MELBOURNE vs MOORABBIN | ADVANCE SCOUTING

Tuesday 17 November 2026 | 18:15 | A W Oliver Reserve | PRELIMINARY

Official ladder: Moorabbin 5–1, 48 RF, 28 RA, +20 RD (6 games); Melbourne 4–4, 52 RF, 57 RA, –5 RD (8 games). Moorabbin November 10 victory already included in ladder; player stats for that game are pending. Both clubs have one additional game before this fixture.

Data scope: The individual tables below aggregate the five supplied game-by-game player-stat batches, not the full six-game official season. The November 10 box score is not added twice. Bats/throws are unverified and left blank. GameDay fractional IP values are converted to outs (0.33=one out, 0.66=two outs).

TEAM TENDENCIES & MATCHUP

Moorabbin average 8.0 runs scored and 4.7 allowed per official game. Melbourne average 6.5 scored and 7.1 allowed. Moorabbin have a +20 run differential and five wins in six games, indicating a strong early team profile; avoid projecting this directly into a single-game outcome.

Offensive read: Jake Bertucci, Brady Jeffcoat, Nicholas Coy and Nicholas Bertucci have produced notable extra-base damage in the supplied sample. Jeffcoat has three HR across the five entered games; Jake Bertucci and Nicholas Coy each have a HR. Attack hitters individually rather than treating the entire lineup as uniform.

Defensive / pitching read: Christopher Nielsen carries the largest identified workload in the sample. Evaluate his workload and availability after Moorabbin's intervening game. Recorded pitcher totals may omit appearances; no unverified rotation or handedness is assumed.

* Pitching ERA qualification: at least one out per official team game (6 outs for six games). All pitching metrics are based only on identified appearances. Recorded pitching R/ER totals may not reconcile with the official six-game ladder. Do not interpret partial-team ERA as full-season ERA.

COACHING & LINEUP USAGE

1. Prepare for Jeffcoat as a power threat; avoid predictable middle-in pitches and unnecessary free passes, especially with runners aboard.

2. Jake Bertucci and Nicholas Coy show extra-base impact and multiple-hit games. Prioritize clean first-pitch plans, location discipline and defensive readiness for hard contact.

3. Nicholas Bertucci and Euan Clarkin have appeared frequently in supplied batting orders; monitor on-base opportunities and any run-game aggressiveness.

4. Confirm Nielsen's latest pitch count and whether he starts or relieves in Moorabbin's next game; do not infer Tuesday availability from historical innings alone.

5. Use aggressive but selective baserunning when pitcher/catcher batteries show vulnerability; the available box scores alone cannot verify pop times or pickoff tendencies.

6. Review lineup order and substitution patterns from the final pre-match box score before issuing specific defensive shifts or bullpen matchup assignments.

HIGHER-LEVEL EXPERIENCE / VERIFICATION

No higher-level playing history is confirmed from the supplied box scores alone. Player names should be checked against ABL, college, representative and international rosters before adding credentials. Unverified name matches are intentionally omitted.

DATA QUALITY & NEXT UPDATE

Sources: user-provided VSBL ladder screenshot, fixture screenshot and five GameDay player-stat batches. Official team record: 6 games; player samples: 5 batches. Missing November 10 player stats, one future Moorabbin game and one future Melbourne game. Some GameDay values can be incomplete or entered incorrectly; differences are flagged rather than filled with invented figures. Verified batting and pitching handedness remains unavailable.

Next refresh: add the November 10 Moorabbin player box score once published, then both intervening game results and player lines. Recompute team totals, qualification asterisks, scout classifications, lineup usage and tactical priorities.
