MELBOURNE BASEBALL CLUB | WEEKLY TENDENCIES

28 October 2026 | 2026–27 season | Through Round 5, including 27 October win over Cheltenham

Record: 2–3. Consecutive wins over Williamstown (8–4) and Cheltenham (final score not supplied). Last verified pre-Cheltenham run totals: 18 for, 35 against, −17 differential. Updated run totals are pending final score.

Round 5 offensive observations: Harvey Chinn went 2-for-3 with a double and home run (4 RBI); Joshua Hendricks went 2-for-3 with two singles and an RBI; Lachlan Brennan and Lennard Pietersz recorded singles. Mitchell scored three runs despite no hits, with a walk and hit-by-pitch; Hargreaves added a double. These are interpreted from the provided fixed column key.

Round 5 pitching: Angus Saggers 2.2 IP, 5 H, 1 K, 1 BB, 2 ER; Max Saggers 2.1 IP, 6 H, 2 K, 1 BB, 4 ER; Simon Fitzmaurice 1 IP, 1 H, 0 K, 1 BB, 0 ER. The supplied IP values 2.66 and 2.33 are converted to baseball outs, not decimal innings.

Coaching read: Hendricks remains a central run-production option. Chinn’s breakout warrants more opportunity, but his early strikeout history suggests monitoring contact consistency. Mitchell continues to offer on-base/run-scoring potential. Pitching depth has expanded, though White and Perrett remain the primary established length options; consider rest and availability.

Data quality: Prior Round 4 batting OBP/OPS are approximations, carried forward from rounded values; they are not independently reconstructed from prior game HBP/SF. The export contains duplicate SB(B), B(P), and WP(P) labels; only the first SB(B) field is treated as stolen bases. Prior missing steals and handedness remain unverified. Wade/Will McConnon identity discrepancy remains unresolved. Cheltenham score and historical full-column exports are still needed for fully audited season totals.

* ERA qualification: fewer than 0.33 IP (1 out) per team game (fewer than 1.2 IP through 5 games). All pitchers remain listed.

Team totals sum the player lines; IP is baseball innings/outs. ERA, WHIP and rate statistics are recalculated from those totals.
Round 5 mapping: IP 19, H 20, SO 21, BB 22, ER 25. Pitching totals are not independently verified official totals.

Pitching strategy: White and Perrett retain the strongest multi-inning sample. Angus Saggers and Fitzmaurice provide additional options, but single-game samples are insufficient to establish roles. Monitor Max Saggers traffic on the bases before assigning leverage innings. Chislett earlier walk rate remains a command concern.

MELBOURNE BASEBALL CLUB | LINEUP & USAGE

PROPOSED BATTING ORDER • Subject to defensive assignments, availability and opponent matchups

Order	Hitter	Reasoning
1	Blake Mitchell	Run-scoring and on-base profile; 3 runs against Cheltenham
2	Ben Aslett	Left-handed option; patience despite slow batting start
3	Joshua Hendricks	Sustained high-contact production and extra-base threat
4	Harvey Chinn	Four-RBI Cheltenham breakout; monitor strikeouts
5	William Kent	Established extra-base contribution across prior rounds
6	Oscar Hargreaves	Walks and doubles; situational on-base value
7	Wade Mcconnon	Prior run-production sample; identity needs reconciliation
8	Lochlann O'Connor	Contact-oriented lower-order option
9	Lachlan Brennan	First hit this week; continue evaluating contact

Other options: Lennard Pietersz recorded a single in his supplied Round 5 line; consider defensive fit and opportunity. Joey White remains a potential two-way contributor when available. The lineup is a coaching concept, not a projected starting nine.

Source provenance: supplied Round 5 Cheltenham individual player export and user-provided fixed column key; prior four-game cumulative Melbourne tendencies PDF dated 27 October 2026. No unprovided final score or unverified handedness was inserted.
