Batting rate statistics are calculated from the supplied four game exports; OBP assumes no unlisted sacrifice flies. No handedness is asserted without verified player-specific evidence. All player rows retained.

SCOUTING CLASSIFICATION KEY

- PRIORITY (red): Most dangerous verified hitter / difficult pitcher
- CAUTION (yellow): Respect productive player or effective arm
- ATTACK (green): Favorable matchup based on current statistical results
- LIMITED (gray): Small sample; insufficient evidence for confident classification

PLAYER EXPERIENCE | PUBLIC-SOURCE CHECK

Baseball Victoria lists Mark Jones (Upwey FTG Black) and Adrian Rice (Upwey FTG Gold) as 2025/26 Masters 38+ East award recipients. This confirms club-level recognition, not collegiate, national-team, or professional experience; identity across divisions should be confirmed before attributing those awards to these Firsts players.
No higher-level playing history could be confidently matched to the supplied Firsts roster in the sources reviewed. Unknown handedness remains blank.

Pitching IP uses baseball outs notation (e.g., 5.2 = five innings and two outs). Team pitching totals are sums of supplied player lines, not independently verified official totals.

COACHING READ | OFFENSE

The ladder indicates substantial Upwey run-prevention problems. Emphasize strike-zone discipline, putting the ball in play with runners on, and avoiding unnecessary outs on the bases. Adam Schoppe has handled the largest documented pitching workload; review recent pitch counts and availability before the game. Do not presume a specific starter.

COACHING READ | DEFENSE

The four supplied lineups show limited offensive production overall. Jordan Elliott and Daniel Smith recorded multiple hits in the supplied games; prioritize sound defensive positioning and avoid free baserunners. Batter handedness and verified higher-level experience remain unconfirmed in this preliminary edition.

DATA QUALITY / NEXT VERIFICATION

The supplied exports include individual appearances but no official game IDs or opponent/date mapping. Games played counts represent appearances in the four provided exports. The player batting runs and RBIs do not necessarily reconcile to the official 2-run ladder total; the ladder remains authoritative. Recheck any duplicate-name profiles before attributing handedness or higher-level experience. Pitching box scores may omit defensive substitutions and other fielding-only appearances.

TEAM-WIDE READ | VERY WEAK OFFENSE AND RUN PREVENTION

2 runs scored and 55 allowed in four games; defense includes pitching and fielding, with errors not isolated.
